Contents of Vol. 142

Part 1

K. Sylvia Richards, A. D. Rush, D. T. Clarke and W. J. Myring. Soft X-ray contact microscopy, using synchroton radiation, of thin-sectioned, lead-contaminated chloragogenous tissue of the earthworm *Dendrobaena rubida* 1

P. L. Gai, M. J. Goringe and J. C. Barry. HREM image contrast from supported small metal particles 9

Klaus-Ruediger Peters. Rationale for the application of thin, continuous metal films in high magnification electron microscopy 25

A. A. Hamza. The interferometric methods applied to the studies of fibrous materials 35

António J. Cidadão and José F. David-Ferreira. A method for TEM visualization of the extracellular matrix three-dimensional organization in tissues 49

M. J. Canny and M. E. McCully. Locating water-soluble vital stains in plant tissues by freeze-substitution and resin-embedding 63

Ladislav J. Kučera. Splitting wood specimens for observation in the scanning electron microscope 71

C. Weibull and A. Christiansson. Extraction of proteins and membrane lipids during low temperature embedding of biological material for electron microscopy 79

F. B. M. Cowan. A stereological analysis of the effect of buffer osmolarity on a salt secreting epithelium, under variable physiological conditions 87

Short Technical Notes

Ernst B. Hunziker and Luis-M. Cruz-Orive. Consistent and efficient delineation of reference spaces for light microscopical stereology using a laser microbeam system 95

G. Martín-Partido, I. S. Alvarez, L. Rodríguez-Gallardo and J. Navascués. Differential staining of dead and dying embryonic cells with a simple new technique 101

L. Siklós, M. Rózsa and J. Zombori. A simple method for correlative light, scanning electron microscopic and X-ray microanalytical examination of the same section 107

R. Perla, J. Dozier and R. E. Davis. Preparation of serial sections in dry snow specimens 111

Letters to the Editor; Book Review; Erratum 115

Part 2

Festschrift in honour of Professor Hatsujiro Hashimoto

A. Howie. Preface 117

H. Hashimoto and Y. Takai. Fine structure of the images of atoms in 001-gold crystals in various Bragg reflecting conditions 119

A. Howie and J. L. Hutchison. Comparison of the diffraction contrast and the slice method for image computation 131
S. Saito, K. Higeta and T. Ichinokawa. Intensity analysis of boron and nitrogen K-edge spectra for hexagonal boron nitride by EELS 141
J. L. Hutchison, W. G. Waddington, A. G. Cullis and N. G. Chew. High resolution imaging of the CdTe/(100)InSb interface: a lattice-matched hetero-epitaxial structure 153
Kun-ichi Miyazawa and Yoichi Ishida. Measurement of translation component at ordered interfaces by weak-beam α-fringe electron microscopy 163
H.-U. Nissen, Y. Kitano and R. Wessicken. High resolution electron microscopy of grain boundaries in Nb_3Ge-films 171
Y. Kitano, M. Takata and Y. Komura. High resolution electron microscopy of partial dislocations in the Laves phase structure 181
G. L. R. Mair and T. Mulvey. Some aspects of liquid metal ion sources 191
K. Hiraga, M. Hirabayashi and N. Ishigaki. High resolution transmission electron microscopy of Sm–Co based permanent magnets 201
Y. Tanishiro, K. Takayanagi and K. Yagi. Observation of lattice fringes of the Si(111)–7×7 structure by reflection electron microscopy 211
M. Shiojiri, T. Maeda, Y. Hirota, T. Isshiki, S. Sekimoto, K. Iwauchi and Y. Ikeda. High-resolution electron microscopy of $Ba_xK_{2-x}Fe_xTi_{6-x}O_{13}$ crystals in polar-glass state 223
Y. Bando, M. Mitomo, Y. Kitami and F. Isumi. Structure and composition analysis of silicon aluminium oxynitride polytypes by combined use of structure imaging and microanalysis 235
K. Morikawa, Y. Fujiyoshi, K. Ishizuka, J. Sugiyama, M. Kawakami and S. Takemura. Electron microscopic study of 5S rRNA crystals from *Thermus thermophilus* HB8 247

Part 3

A. J. Baddeley, H. J. G. Gundersen and L. M. Cruz-Orive. Estimation of surface area from vertical sections 259
M. E. Twigg, S. Nakahara, D. M. Maher, T. T. Sheng and R. J. Holmes. Diffraction pattern indexing in lithium niobate 277
John M. Squire, Pradeep K. Luther and Gerard D. Agnew. Averaging of periodic images using a microcomputer 289
J. L. Burton and H. L. Bank. Analog enhancement of videomicroscope images 301
H. P. Ting-Beall, Florence M. Burgess and J. David Robertson. Particles and pits matched in native membranes 311
G. D. Danilatos. Environmental scanning electron microscopy in colour 317
K. M. Keville, J. M. Caruthers and E. I. Franses. Characterization of dimensions of ellipsoidal microparticles via electron microscopy 327
N. J. Garrahan, R. W. E. Mellish and J. E. Compston. A new method for the two-dimensional analysis of bone structure in human iliac crest biopsies 341
Joanna Wróblewski and Romuald Wróblewski. Why low temperature embedding for X-ray microanalytical investigations? A comparison of recently used preparation methods 351
Ronald R. Warner. Water content from analysis of freeze-dried thin sections 363

Short Technical Note
R. H. Lowndes and M. B. Hallett. A versatile light microscope heating stage for biological temperatures 371
